

BOTWHEEL EXPLORER KIT

\$799.00 ~~\$930.00~~

A high-performance modular robot chassis, featuring the ODrive S1 and ODrive Botwheels. Powerful and

\$799.00 ~~\$930.00~~

Note: The Botwheel Explorer kit requires assembly, as well as additional components and tools to complete.

- Included in full kit: dual ODrive S1 + ODrive Botwheel
- Easy setup in the ODrive GUI, and demo software for remote control
- Aluminum chassis for ruggedness and reliability
- A 30x30mm grid M5 (untapped) hole pattern for mounting additional sensors and actuators
- 100kg load capacity

Additional components required, even for "Full Kit".

Assembly, wiring, and software setup documentation

CAD

We have updated the kit to include a larger and more powerful motor which is larger and more powerful. Please contact us if you would like to order the new kit.
